Annex 1: Company Profile

Advanced Technology Systems Company (ATSC) is a U.S. Defense and Government contracting company that specializes in providing government and defense agencies with technology solutions for their Force Protection, Border and Maritime Surveillance, Integrated Logistics Support, Cyber Security, and Research and Development needs through our extensive domestic and Foreign Military Sales (FMS) experience. At ATSC and STARA Technologies Corp., a wholly-owned subsidiary of ATSC, we design and implement solutions that ensure our clients' air, land, and sea operations are able to achieve optimal results. This is accomplished through a robust research and development capability within ATSC especially in the border and maritime security technology field.

Headquartered just outside of Washington D.C. in McLean Virginia, with offices in Beirut, Lebanon, Cairo and Alexandria, Egypt, ATSC has developed a unique and proven business model that operates with the US Federal Government while leveraging its interests in the Middle East, Southwest Asia, and Europe. ATSC's McLean-based headquarters and program office is currently engaging in multiple programs with the US Army and the US Navy. We pride ourselves on having established a solid foundation of business procedures and processes for delivering detailed program plans and controls for performing in the Middle East, Southwest Asia, Europe and the USA.

ATSC's strength lies in our knowledgeable staff who offer our clients a comprehensive set of quality services and solutions in the disciplines of logistics support, project management and training, system installation and integration, technical assistance, remote video surveillance, security systems, special construction, border surveillance, perimeter security, cyber solutions, and harbor protection systems.
