

Brilliant Corporation
Supplement to BSTC Application

Brilliant Corporation is a Solutions Engineering firm that specializes in Information Management, Intelligent Technology solutions and Business Process Management.

Brilliant is utilizing its expertise in Big Data analytics as well as Artificial Intelligence (AI) driven intelligent solutions including cognitive vision, intelligent analytics and intelligent automation to solve numerous border security challenges. Some of these include better situational awareness of illegal border crossers, intelligent sensor data analytics, data fusion, data correlation and automation freeing up border personnel to focus on higher value tasks. The focus is on assisting agencies with improving border security efficiency and reducing costs while scaling up infrastructure.
