## Our Services

### IT Modernization

We provide a diverse set of IT services that includes Network Engineering, Technology Modernization & Optimization, Virtualization, System Integration, System Architecture & Design, and Innovative Technology solution development and integration.

### Cyber Security

We offer a fundamentally different approach to enterprise security. Our awareness of the global threat landscape, from the endpoint, to the cloud, to the data center allows for a holistic security architecture.

### Cloud

Sev1Tech helps organizations consolidate data centers or expand into the cloud by using proven methods to develop requirements and define optimal build strategies.

### IT Operations

We deliver ITIL based 24x7 IT Mission Operational Support across network, server, storage, middleware, and security functions.

### Systems Engineering & Integration

We provide C5ISR customers Systems Training, Test & Evaluation (T&E), Installation & Integration, Systems Sustainment & Modernization, Systems Interoperability, and Validation and Verification (V&V).

### Logistics & Supply Chain Management

For our mission critical programs, we provide Field Support Services, Integrated Logistics Systems, Warehouse Operations & Asset Management, Logistics Acquisition Lifecycle Planning Support, Reset and Repairs, and Integrated Product Support.

### Training & Readiness

Sev1Tech augments Warfighter mission readiness through e-Learning, Constructive Simulation, Live Training & Exercise Support, Course Content Development & Delivery, Foreign Military Training, and Institutional Capacity Building.

### Mission & Program Support

Sev1Tech provides exceptional leaders and staff to deliver innovative customer-centric solutions that align with customer goals, reduce costs, and enhance service delivery.
