### **Moog Sensor and Surveillance Systems (S3)**

Moog Sensor and Surveillance Systems (formerly QuickSet) products have supported U.S. and foreign border security initiatives for over 30 years, with nearly 2,000 positioners deployed within the United States alone. From the hot desert to the cold mountains, our products enable and support Border Agents, Officers, and Operators in achieving their mission.

The Moog S3 group provides standard and custom turnkey solutions in the Pan and Tilt actuation/sensor system arenas along with a full set of deployable tripods for mobile and tactical needs. Our actuation systems can be provided with multi-channel copper and RF channels thus allowing easy integration for camera systems and additional sensors (as needed).

Whether designing new products for challenging markets or customizing current products to help solve a specific problem, the Moog S3 team is uniquely qualified to deliver solutions that will meet operator's needs.

Our motivation goes beyond the commitments we make to quality, technology, operational excellence, and customer service. Our team is purposefully focused on equipping, protecting, and enabling those who depend on us.

We deliver superior quality solutions to our customers' most challenging motion control, data transmission, and surveillance problems through collaboration, innovation, and lean excellence.
