creating digital experiences that **elevate** agency missions

MetroStar develops and implements Applied Intelligence, DevSecOps, Human-Centered Design, Cloud, Cybersecurity, and Enterprise IT services for defense, intelligence, homeland, and civilian agencies.

We're a mission accelerator. We embrace disruptions in tech to propel progress. Through our user-centric capabilities, we create new paths to government innovation and shape thoughtful outcomes for the people.
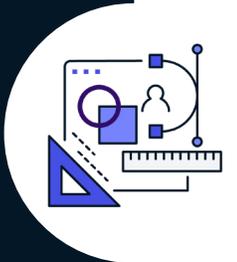

our capabilities

MetroStar develops and implements Applied Intelligence, DevSecOps, Human-Centered Design, Cloud, Cybersecurity, and Enterprise IT services for federal agencies.

Applied Intelligence
Unifying analytics, AI, and automation to create value

DevSecOps
Achieving high velocity deployments that are more secure, consistent, and reliable

Human-Centered Design
Putting human perspectives at the heart of every solution

Cloud
Transforming the enterprise to increase resiliency and maximize productivity

Cybersecurity
Detecting and defending mission-critical systems, operations, and people

Enterprise IT
Architecting, deploying, and optimizing modern, user-centric infrastructures
